

# 360-degree Rotating Shaker Instruction Manual

FK-360 has obtained CE Marking and Taiwan patent No. M575318

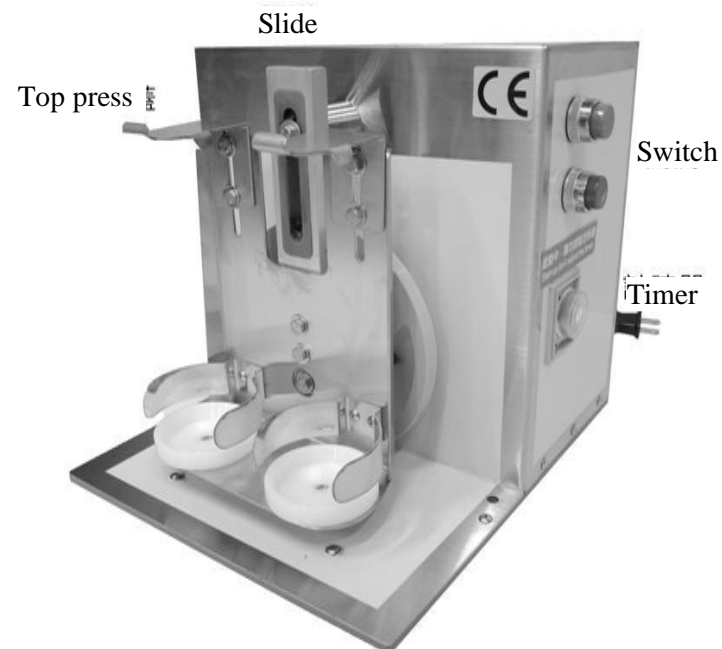

## Instructions for use

1. Loosen the screw with a 10mm wrench. After placing the shakers on the holders, adjust the top presses until they touch the top of the shakers firmly.
2. Adjust the desired seconds with the timer. When the time is up, the timer will stop automatically. (Do not adjust the timer while the machine is running)
3. Turn on the power. (Please ensure that the machine voltage is 110V/220V).
4. Press the START switch.
5. To temporarily turn off the power, press the OFF switch. Do not adjust the timer directly.
6. Please lubricate the slide frequently [with mechanical/food grade lubricant].
7. Do not flush the electronic parts with water or allow them to get wet to avoid malfunction.

## Precautions

1. When cleaning the machine, do not clean the electronic parts and bearings. Clean the product by wiping it with a dry cloth.
2. Do not adjust the timer directly while the machine is running to avoid timer malfunction.
3. Place the machine on a stable and non-wobbly table to avoid affecting the quality of the machine.

Machine dimensions	36 x 30 x 30cm
Voltage	110V / 60Hz
Watt/ampere	60W / 1.3A
Motor rotational speed	1500rpm CONT: 30 min.
Thank you for using the shaker. I wish you a thriving business.
